EXPERIENCE

Senior Software Engineer

Feb 2023 – May 2025

GeekyAnts India Pvt. Ltd.

- Architected and built custom Order Management System with checkout and payment integration using Nest.js, AWS, Kafka, and Kubernetes and Microservices processing \$2M+ in annual revenue.
- Led critical database migration from Firebase to MongoDB, improving query performance and data management.
- Spearheaded user KYC and KYB integration reducing verification time from days to minutes while enhancing platform security and compliance.

Software Engineer III

Feb 2022 – Feb 2023

GeekyAnts India Pvt. Ltd.

- Built enterprise workspace booking system handling 5K+ daily reservations across 100+ locations with 95% reduction in booking conflicts.
- Architected and implemented document e-signing and e-stamping workflow using Leegality, Express.js, Cloud Pub/Sub and webhooks streamlining membership agreements.
- Built and maintained mission-critical web applications using Google Cloud services (Functions, App Engine, Pub/Sub).

Assistant System Engineer

Aug 2020 – Feb 2022

TATA Consultancy Services Ltd.

- Modernized banking website migrating to React in a 6-developer team.
- Developed analytics tool for TCS HOBS increasing product team efficiency.
- Created dynamic dashboard creation functionality enabling custom data visualization from multiple sources.
- Implemented data filtering and chart generation features using QueryBuilder.js, D3.js and Java Hibernate.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS.

Backend: Node.js, Nest.js Express.js, Redis, Kafka, Microservices.

Frontend: React, Redux, Next.js.

Databases: Firebase Firestore, MongoDB, SQL, PostgreSQL.

Cloud & Infrastructure: GCP (Cloud Functions, App Engine, Pub/Sub, Cloud Tasks, KMS, etc.), AWS (SQS, S3, API Gateway).

Tools : Git, GitHub Actions, CI/CD, NewRelic, Sentry, Jira.

Soft Skills : Team Player, Excellent Communication, Fast Learner, Adaptable, Go-Getter.

PROJECTS

PAN Card Data Extraction using OCR | *JavaScript, Next.js, GitHub Actions, GCP App Engine, Pub/Sub*

code 

- A Javascript OCR to scan PAN cards and extract key information, including PAN, name, father's name, date of birth, etc.
- Implemented a scalable micro-services architecture with an event-driven design for efficient processing.
- Utilized Node.js, Express.js, Next.js, Google Cloud App Engine, Pub/Sub, Firebase Firestore and GitHub Action.

Online Job Application System | *JavaScript, React, Java Hibernate*

- Automate and digitize the conventional, multi-step job application system of the Sardar Patel University.
- Dealt with huge amount of user data such as hundreds of publications and conference talks for the job applications.

Crime Reporting App | *Android(Java), PHP, MySQL, HTML, CSS, JavaScript*

- Developed an android mobile app to report crimes faster to the nearest police station than the traditional system.
- Added functionality to send instant auto-generated help messages and journey notifications to a pre-added list of favorite contacts, as well as police stations.

EDUCATION

Msc. Computational Science

Laurentian University, Sudbury, Ontario

2025 – present

Master of Computer Application

85%

Sardar Patel University, Vallabh Vidyanagar

2017 – 2020

Bachelor of Computer Application

80%

Veer Narmad South Gujarat University, Surat

2014 – 2017
