SUMMARY

Senior Backend Engineer with 5+ years of experience building scalable backend systems, distributed architectures, and cloud native applications using Node.js, TypeScript, AWS, and GCP. Experienced in fintech, enterprise SaaS, payment integrations, event-driven systems, and cross-functional collaborations. Available for full-time opportunities. No sponsorship required.

EXPERIENCE

Senior Software Engineer

Feb 2023 – May 2025

GeekyAnts

- Owned backend for **PayPenny**, a remittance app processing **\$1M+/month** across Canada, UK, Australia, and EU.
- Architected and scaled **WeWork India**'s backend systems handling **\$4M+ monthly** transactions, replacing Shopify with a distributed and event-driven Order Management System (OMS).
- Designed and owned **checkout** microservice with Juspay **payment gateway** integration, handling complex payment flows such as retries, cancellations, partial payments, invoicing, and refunds.
- Migrated Firebase to MongoDB and PostgreSQL, boosting API performance by 50%, improving data integrity & scalability.
- Improved application security by identifying and mitigating **OWASP Top 10** vulnerabilities; and mentored engineers.

Software Engineer III

Feb 2022 – Feb 2023

GeekyAnts

- Built enterprise workspace booking platform serving **5000+ daily reservations** across 100+ locations, reducing booking conflicts by **95%** through event-driven microservices and async workflows.
- Reduced legal onboarding turnaround time from days to minutes by integrating **DocuSign** and Leegality e-sign and e-stamping workflows for automated membership agreement processing.
- Managed cloud-native backend services & third-party integrations using Node.js, Express.js, PostgreSQL, MongoDB, GCP.

Assistant System Engineer

Aug 2020 – Feb 2022

TATA Consultancy Service (TCS)

- Built a **configurable analytics and reporting platform** enabling users to connect different data sources including databases and files, define query criteria, and create interactive dashboards using D3.js.
- Developed a custom query engine to execute SQL-like filtering against file-based datasets.
- Managed user provisioning, role assignments, and authorization controls within **SAP S/4 HANA** enterprise systems.

SKILLS

Backend & Architecture: Node.js, TypeScript, JavaScript, Java, NestJS, Express, Event-driven Microservices, Kafka, REST APIs.

Frontend: React, Redux, Next.js, React Native.

Cloud & Infra: Docker, CI/CD, AWS (EC2, SQS, Lambda, RDS, S3), Google Cloud (Pub/Sub, Functions, App Engine, KMS).

Observability & Tools: Git, Jira, Metabase, AWS Cloud Watch, Sentry, NewRelic.

Databases & Search: MongoDB, PostgreSQL, MySQL, Firebase, Supabase, Elastic Search, Algolia, Redis.

AI Tools: Claude, ChatGPT, Google AI Studio, Cursor, Lovable.

PROJECTS

Inner Voice | *consumer focussed employee feedback platform*

innvoicehq.com 

- Anonymous employee feedback platform to collect, analyze, and respond to workplace feedback with a public wall.

Twitnator | *Twitter/X Feed Cleanup & Filtering Extension*

twitnator.com 

- A Chrome extension to block ads, automate feed filtering, and UI enhancements, and prioritizes signals over noise.

EDUCATION

MSc. Computational Science

9.0

Laurentian University, Sudbury, Ontario

2025 – Jul, 2026

Master of Computer Application

85%

Sardar Patel University, Vallabh Vidyanagar, India

2017 – 2020

Bachelor of Computer Application

80%

Veer Narmad South Gujarat University, Surat, India

2014 – 2017
